Instant LCS Archive Viewer Maintains Chat History Fully Searchable Displayed Within LCS Client

Instant LCS Archive Viewer is the very first product from Instant Technologies to extend Microsoft's Live Communication server. It is also the very first of its kind. Instant LCS Archive Viewer allows users to instantly have access to all their chat conversations directly through the LCS client interface. All of this is being accomplished on a backend built strictly adhering to .Net standards.

Instant LCS Archive Viewer also allows for printing, emailing, and searching all chats that have taken place by a particular user.

- **Sits in the LCS Client** Instant LCS Archive Viewer sits directly in the LCS client interface and is accessible through a tab.
- **Fully Searchable** Chat conversations in the archive are fully searchable so that a user may quickly find the information they are looking for.
- **Display by Date** View conversations by date to easily retrieve information from a conversation you know that took place on a particular day.
- **Display by Person** Another custom view that allows a user to view all conversations they had with another user.
- **No Client Installation** No installation necessary, a simple registry edit adds the Instant LCS Archive Viewer tab instantly to a client's LCS interface.
- **Intuitive Interface** The multiple views and search features are very easy to use, allowing for quick access to important information.
- **Advanced Search Features** Search for conversations: using boolean operations, within timeframes, over a set conversation length, or with a particular person.

With Instant LCS Archive Viewer anyone using LCS may quickly and easily retrieve information from past conversations without the hassle of having to open or install any additional software on their machine.
