

INSTANT TEAM SESSIONS

Persistent, Topic-based Real-time Team Collaboration

Your Business Dilemmas

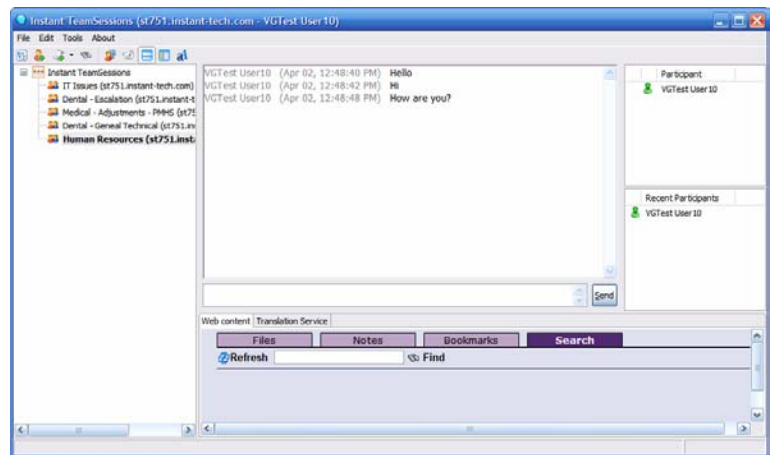

Do you need to build persistent virtual meeting rooms to facilitate real-time group communications?

Do you need to enable groups to communicate and share documents in a real-time environment that is encrypted and secure?

Instant Solution: Instant Team Sessions

Instant Team Sessions delivers encrypted and secure browser-based persistent chat rooms for IBM Lotus Sametime. Instant Team Sessions combines the presence awareness and real-time communication benefits of instant messaging with the persistence of email.

Cross-organizational teams can collaborate on specific topics in the atmosphere of an open forum where both the chat room and the content— conversations, documents, files, bookmarks—persist over time. Access is controlled and password protected, and all conversations are time synchronized.

- ◆ Chat rooms are persistent
 - ◆ Members can come and go at will; the room—and a transcript of all that transpired—will be there when they return
- ◆ Chat rooms are secure, conversations are encrypted
 - ◆ Discuss confidential matters and share sensitive documents safely in real time
 - ◆ Each room can have its own Access Control List
 - ◆ Uses underlying Sametime and Domino security models
- ◆ Runs on Domino
 - ◆ You do not need to license, deploy, and manage Websphere
- ◆ Browser-based architecture
 - ◆ Zero touch = instant deployment

INSTANT TEAM SESSIONS

Persistent, Topic-based Real-time Team Collaboration

- ◆ Content is persistent
 - ◆ Store information relevant to the team—discussions, tasks, documents, bookmarks
 - ◆ Team members automatically receive a chat history when they enter the room
- ◆ Automatic contextual alerts
 - ◆ Users can create alerts so they will be notified when a topic relevant to their requirements is being discussed
- ◆ Integrated extension for Websphere Translation Server
 - ◆ Automatically translates all chat conversations from the language of the sender to the language of the recipient
 - ◆ Removes language barriers from real-time communications
 - ◆ Deployment is quick and easy--simply specify the IP address of the Translation Server in the preferences menu of Instant Team Sessions' Sametime Connect client

How it Works

- ◆ Role-based rights for room creators and system administrators
- ◆ New rooms are created and customized using a web browser (IE or Firefox)
- ◆ Each room has its own Access Control List
 - ◆ Members are authenticated based on their personal log in information
- ◆ Traffic is encrypted and logged

"We have project teams comprised of employees scattered all over the globe. Instant Team Sessions enables them to stay current with discussions that happen both during and after their respective work days."

"Instant Team Sessions turned a convenient conversation medium into an iron-clad secure group collaboration environment."

About Instant Technologies

Instant Technologies specializes in developing innovative, enterprise-class compliance and productivity solutions for IBM Lotus Sametime and Microsoft Office Communications Server, including IM archiving, IM queue management, persistent chat rooms, IM bot development, buddy list administration, and more.
